## Notes

- 1. The 1860 and 1870 census mortality schedules asked different questions.
- 2. The 1860 schedules did not link those who died to families enumerated thus making it impossible to identify unnamed infants.
- 3. A few medical terms:

Bold Hives = Croup

Dropsy = fluid retention often due toheart failure or kidney disease

Dyspepsia = indigestion & heartburn, heart attack symptoms

Erysipelas = contagious skin disease

Fistula = connection between structures not normally connected

Flux = excessive flow or discharge of fluid

Palsy = paralysis, often meant stroke
